

## BEF 250V – Robust concrete and screed milling machine with combustion engine for medium areas

Equipped with the Schwamborn system with front-mounted milling drum, the BEF 250V ensures particularly uniform milling of concrete and screed without "copying effect". With a working width of 250 mm, the concrete milling machine is suitable for medium-sized areas and is therefore perfect for removing uneven floors, protrusions and markings.

### Applications

Removal of uneven floors, supernatants, remove markers, removing road markings, milling off coatings, deep removal of concrete and screed floors

Drum position in front = uniform surface finish

Drum with replacement bushes = longer service life

Technical data		Equipment variants	
Ref. No.		707015	707017
Drive		Petrol	Petrol
Power output	kW	8	8
Working width	mm	250	250
Operating weight	kg	170	170
Edge distance	mm	65	65
Tank	l	6.1	6.1
Ø-Dust control	mm	76	76
Dimensions LxWxH	cm	135 x 50.7 x 109	135 x 50.7 x 109
Cutters		Carbide cutters	Peeling cutters

### Special characteristics

- Motor overload protection
- Micro depth control
- Drum in front, thus no copy effect (System Schwamborn)
- Quick drum lowering/lifting
- Drum with bushes, longer service life
- Brake adjustable, engage/disengage
- Adjustable brake system with on/off device
- 6.1 l fuel tank
